Statement

CE marking on our fittings according to Construction Products Regulation (EU) No 305/2011 and repealed Council Directive 89/106/EEC

To whom it may concern,

you have asked for CE marking on our products according the requirements of the Construction Products Regulation.

We have checked your request and can inform you as follows:

Our fittings are manufactured, amongst others, according the standards EN 10253-1, EN 10253-2 and EN 10253-4. These standards are harmonised standards of the Pressure Equipment Directive (PED) and our fittings are defined there as material, which is not subjected to the CE-Marking-requirement.

Furthermore these standards are not harmonised standards of the Construction Products Regulation (EU) No 305/2011 and repealed Council Directive 89/106/EEC.

Therefore it is not necessary and / or possible to mark these fittings with CE marking.

If you have any further questions, please do not hesitate to contact me.

Best regards

Bruno Haiß
