Byggvarubedömningen's guideline and information requirements for assessment of product, Version 2016-1.

These guidelines describe what information that Byggvarubedömningenrequires for assessment of articles and chemical products. Information about the article or chemical product can be provided in this document, alternatively refer to another documentation in which the corresponding information is given.

1. Product information

Product

Product name:	A-COLLECTION PATCH RJ45 C6 UTP LSZH 0.5-20m			
Article No.: Specify the type of number, for example RSK, E number, EAN, GTIN or supplier's article number. This should also be stated on the application.	5153600, 5153601, 5153602, 5153603, 5153604,5153605,5153606,5153607, 5153608			
Product description:				
On application, please attacha product data sheet or similar documentation.				
Type of product:	☐ Chemical product	Article		
Date (year, month, day) of preparation/revision:	2018-03-09			
Supplier/Manufacturer				
Supplier:	Ahlsell Sverige AB			
Manufacturer if other than the supplier:				
Voluntary information				
Contact person:	Katrine Pettersson			
Address:	Rosterigränd 12			
E-mail:	emv@ahlsell.se			
Phone number:	08-6857000			
Supporting documentation				
Has a declaration of performance, in line with the Swedish Construction Products Regulation, been prepared for the product?	Yes	X No		
If yes, attach the declaration of perfo	rmance with the application	·		
Is the article/product an electronic product and covered by the RoHS-directive (2011/65/EU)?	☑ Yes	□ No		
If yes, attach an "EU Declaration of Control product corresponds to the requirement application				
If the article/product is an electronic product that is covered by an exemption according to RoHS-directive (2011/65/EU), specify which exemption and date (year, month, day) when the exemption	Exemptions according to RoHS: Date:			

BVB's guideline and information requirements for assessment of product, Version 2016-1. Updated information 2016-12-19

expires if time-limited:	

2. Declaration of contents:

Does the product or any of its subcomponents, if it is a composite product, contain substances with particularly hazardous properties (Substances of Very High Concern, SVHC-substances), which are included in the Candidate List at a concentration above 0.1 weight%?	Yes	☑ No	
If yes, specify which substances in Table 1.			
State the date (year, month, day) for control the Candidate List.	Date:		
The concentration is calculated at component level established on the principle "once a product, always a product".			
The Candidate List is available at: http://echa.europa.eu/sv/candidate-list-table.			

Specify the total content of the article or the chemical product, **on delivery**, in Table 1, or alternatively attach other documentation that provides the corresponding information. For instructions, please refer to the "Declaration of contents, BVB's declaration requirements, 2016-1", which is found at the end of this document.

7. Waste management

Does the product require special measures to protect health and the environment in conjunction with demolition/dismantling?	☐ Yes	⊠No
If yes, describe:		
Is the product covered by theWEEE-directive 2012/19/EU (Swedish ordinance(2014:1075) on Producer Responsibility for electricaland electronic products when it becomes waste?	☑ Yes	□ No
Is it possible to re-use all or parts of the product?(can the product be reused within the product's expected lifetime)?	☑ Yes	□ No
If yes, describe: Reusable use of this product		
Is material recycling possible for all or parts of the product when it becomes waste?	☑ Yes	□ No
If yes, describe: Recyclable material: Copper conductor: LSZH;TPE		
Is energy recycling possible for all or parts of the product when it becomes waste?	☐ Yes	☑ No
Does the supplier have any restrictions and recommendations for reuse, material- or energy recycling or disposal?	☐ Yes	☑ No
If yes, specify which:		
When the supplied product becomes waste, is it classified as hazardous waste?	☐ Yes	☑ No
If yes, specify the waste code: The Swedish waste ordinance (2011:927) https://www.notisum.se/rnp/sls/lag/20110927.htm	Waste code:	
8. Indoor environment		
Has the product a critical moisture condition: Information regarding whether critical moisture conditions leading to microbial growth apply for the material/product should be stated, but will not impact the assessment.	☐ Yes	☑ No
If yes, specify which:		
Is the article (or chemical product) intended for indoor use?	☑ Yes	□ No
If yes, has emission data been produced for volatile organic compounds?	☐ Yes	☑ No
If yes, attach the report/certificate together with the a		
If no, is there any motivation for why emission data for volatile organic compounds is not relevant for the product?	Motivation: Products do not contain org	anic compounds

Certificate of substance content and concentrations version. 4.0

This certificate is required for the Recommended assessment level for chemical contents. This page should be printed to be signed and uploaded separately in PDF-format in connection with the application.

Certificate of declaration of substance content

F		
		pecified below, with their stated article numbers, the following is certified: o certify alternative A or B.
Choose	whether to	It is hereby certified that concentrations of the included substances down to 0.01 weight% have been reported, and that cadmium and mercury do not occur in the product.
A		or:
		The substances included are reported in line with the instructions for the Declaration of Contents, BVB's reporting requirements 2016-1, and correspond to the reporting requirements for the Recommended level.
		It is hereby certified that concentrations of the included substances down to 0.1 weight% have been reported, and that cadmium and mercury do not occur in the product.
В		or:
		The substances included are reported in line with the instructions for the Declaration of Contents, BVB's reporting requirements 2016-1, and correspond to the reporting requirements for the Accepted level.
		specified below, with their stated article numbers, the following is certified: o certify alternative C or D.
С	otag	It is hereby certified that the specified product/s do not contain specifically indicated substances and groups of substances in accordance with Table 4, Specifically indicated substances. These have not been added during production and have not been formed through reactions between the substances in the product.
D		Unfortunately, we have to notify that the specified products contain specifically indicated substances in accordance with Table 4, Specifically indicated substances. Some of these substances have been added or been formed during reaction between the substances in the product, please see the Declaration of Contents.

Table 4, Specifically indicated substances

rable 4, Specifically maleated sobstances	
Substance group/Substance	Examples of properties
1. Arsenic and its compounds ¹	Toxic, Environmentally hazardous
2. Brominated flame retardants	Potentially PBT/vPvB, PBT/vPvB
3. PFOA (perfluorooctanioic acid)	Persistent, bioaccumulative, probable reproductive toxicity
4. PFOS (perfluorooctanesulfonates)	Potentially PBT/vPvB, PBT/vPvB
5. Organotin compounds	Potentially PBT/vPvB, PBT/vPvB, Toxic, Environmentally hazardous
6. Biocidal product applied on products (surface treatments) to provide a disinfectant or antibacterial effect.	Toxic, Environmentally hazardous

¹Arsenic, or arsenic compounds, are not permitted to be added to the product.Contamination of used raw materials is not permitted to exceed 10 mg/kg. The concentration limit is set based on regulatory requirements for soil quality to ensure that accepted products do not raise background concentrations through their use or disposal (for example; sludge from sewage treatment works Swedish Ordinance 1998:944, Section 20). The same concentration limits are found in the Swedish Environmental Protection Agency's general guidelines for less sensitive land use (MKM).

declaration:	
Signature:	
Place and date (year, month, day):	2018-01-24

Declaration of contents, BVB's declaration requirements, 2016-1

A complete declaration of contents in accordance with the instructions should be made for both products and chemical products. For products, concentrations have to be reported as a weight% for the entire product as minimum. The contents can be provided in other documentation, if the reporting instructions are complied with, or alternatively supplemented so that they are in compliance. Reporting requirements for the Accepted level correspond to the requirements for "e-BVD2015".

For the Accepted and Recommended levels, classified substances are needed to be reported in the documentation if concentrations exceed limits (weight%) in accordance with *Table 5*, *Classified substances*. Those substances that are not included in Table 5 must be reported when concentrations of $\geq 2\%$ occur.

Material and substance contains can be provided in intervals. Examples of accepted intervals are: $\leq 1\%$, 1-2.5%, 2.5-10%, 10-25%, 25-50%, 50-75%, 75-100%. In occasion of large intervals, state the reason for the variance and describe what materials/substances increase or decrease in proportion if the product, for example, comes in different sizes.

If classification is applied that is not covered by harmonized classification, this information requires to be reported in the comments column for that substance.

Table 5, Classified substances

 $BVB's\ guideline\ and\ information\ requirements\ for\ assessment\ of\ product,\ Version\ 2016-1.\ Updated\ information\ 2016-12-19$

*Substances on the Candidate List have to be reported at component level.

Descriptions of material

Substances should be reported with their CAS- or EC number. Exemptions for certain material can be performed in accordance with the following instructions.

Metals should always be reported together with their alloy number. Alternatively, substances comprising more than 0.01% of the alloyhas to be specified in the documentation.

Plastics and rubber materials should be reported together with their name so that it is clearly which monomers that are included, for example, acrylonitrile butadiene styrene (ABS), polyethylene (PE), etc. Additives that have not formed polymers should always be reported in accordance with requirements specified above (for example pigments, plasticizers, stabilizers, etc.).

Plastics/polymers with descriptions in line with the following list are accepted without specification of monomers.

- Polycarbonate (pertains to bisphenol A based polycarbonates)
- Polyester (monomers must be specified for halogenated polyesters)
- Polyurethane (monomers must be specified for halogenated polyurethanes)
- Fiberglass reinforced epoxy resin laminates FR4 (pertains to tetrabromobisphenol A based polymers)
- MS-polymer (refers to silane modified polyether)

Note that if the plastic/polymer contains additives (such as pigments, plasticizers, stabilizers, etc.), they shall always be reported in accordance with the declaration requirements.

Other materials with the following descriptions are accepted without clarification or detailed description of their components as the materials normally consist of:

- Glass (any content of lead needs to be reported for the assessment level recommended, e.g. relevant for recycled glass)
- Concrete (polymers included in the concrete are reported separately)

Examples of designations of plastics/polymers and other material descriptions that require further clarification are:

- Polymer dispersion
- Copolymer
- Thermoplastic elastomers (TPE)
- Thermoplastics
- MS polymers
- Mineral fillers
- Silanes: The type of polymer needs to be given, e.g. if it refers to a silane/silyl modified polyether or polyurethane.
- PVC: for contents above 2%, plasticizers always needs to be given with CAS no. Concentration of plasticizers below 2%, needs to be declared according to declaration requirements specified in Table 5. If no plasticizer is declared, the reason for that needs to be given.
- EPDM and SBR rubber: for levels above 2%, mineral/paraffin oil always needs to be given with CAS no. As an alternative, the maximal PAH content in the material can be given. For products intended to be used in contact with skin, the maximum content of PAH content shall be reported.
- The PAH content in the material needs to be reported for the assessment level recommended when asphalt/bitumen is present above 10% in the product.

 $BVB's \ guideline \ and \ information \ requirements \ for \ assessment \ of \ product, \ Version \ 2016-1. \ Updated \ information \ 2016-12-19$

For complex products, references to subcomponents which are assessed in BVB's systems with a specified BVB ID, can be used.
