

R3/5/7 Gauges

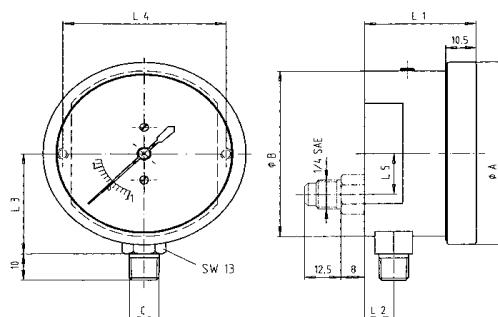

Bellow type gauges

A metal bellow type gauge is very sensitive and therefore much more accurate than a standard bourdon type gauge. The main benefit of a bellow type gauge is that it is extremely accurate and highly over-pressure resistant. The bellow type gauge is accurate within 1% around the gauge face and can withstand up to 2.5 times over-pressurization of the printed pressure scale without damage to the gauge. A bourdon tube gauge cannot withstand this type of over pressurization.
